Urgent – extend feedback period for Edmondson Park commuter car park

Dear Minister,

I write in relation to the concept design that has been released for the first stage of the Edmondson Park commuter car park.

I urgently request you extend the feedback period beyond Friday 10th April 2020.

The parking crisis at Edmondson Park Station has been an ongoing source of frustration and angst for local residents for many years. They deserve ample opportunity to provide feedback on the commuter car park concept design.

Given the current COVID-19 pandemic, local residents are rightly focused on the well-being of themselves and their families. Unfortunately, people have lost their jobs. Many parents are now responsible for overseeing their children's education and countless people are adapting to working from home.

Everyone's attention is on the pandemic and how they can keep themselves safe whilst navigating the financial, social and mental health impacts of the COVID-19 crisis.

It is only fair that local commuters be given more time to have their say on this important community issue.

I look forward to your urgent advice on this matter.

Yours sincerely,

A handwritten signature in blue ink, appearing to read 'Anoulack Chanthivong'.
